

AMAR NARHARE

FRONT END DEVELOPER • UI/UX & WEB PERFORMANCE ENGINEER

Phone: +91 93704 78892 • Email: amarnarhare@gmail.com • Location: Bengaluru, Karnataka, India
LinkedIn: linkedin.com/in/amar-narhare-b93776185

PROFESSIONAL SUMMARY

Results-driven **Front End Developer** with 4+ years of hands-on software engineering experience specializing in architecting modern, high-performance, and responsive web applications using **React.js, Next.js, TypeScript, and modern JavaScript (ES6+)**. Proven track record progressing from enterprise full-lifecycle UI development at **Accenture** to delivering high-impact client web solutions as an independent **Frontend Freelance Contractor**. **AWS Certified AI Practitioner** skilled in integrating AI services, RESTful/GraphQL APIs, and headless CMS platforms into intuitive, accessible user interfaces. Passionate about modern UI/UX design systems, Core Web Vitals optimization, and clean, scalable code architectures.

TECHNICAL SKILLS

Core Frontend:	React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, SCSS, Material UI, Shadcn UI
State & Data Layer:	Redux Toolkit, Zustand, React Query (TanStack), Context API, REST APIs, GraphQL, Axios, WebSockets
Cloud, AI & DevOps:	AWS (Certified AI Practitioner), Generative AI API Integration (Bedrock, OpenAI), Git, GitHub Actions, Vercel, Docker
Testing & Performance:	Jest, React Testing Library, Cypress, Vite, Webpack, Core Web Vitals, Chrome DevTools, Lighthouse
Enterprise & UI Systems:	Lightning Web Components (LWC), Figma-to-Code, Responsive Web Design, WCAG 2.1 Accessibility, Agile/Scrum

PROFESSIONAL EXPERIENCE

Frontend Freelance Contractor <i>Independent Software Consultant • Remote</i>	01/2023 – Present <i>Self-Employed</i>
- Architected & delivered responsive Single Page Applications (SPAs) and web portals for diverse international clients utilizing React.js, Next.js, TypeScript, and Tailwind CSS, achieving cross-browser compatibility and sub-1.5s First Contentful Paint (FCP). - Engineered dynamic client dashboards with complex data visualizations (Recharts, Chart.js) and state management via Redux Toolkit and TanStack Query, reducing API payload latency by 35% through intelligent client-side caching. - Integrated AI-powered features & generative UI components using AWS Bedrock and OpenAI APIs, implementing real-time streaming LLM response interfaces, conversational assistants, and prompt-driven user workflows. - Translated high-fidelity Figma designs into modular, reusable, and WCAG 2.1 AA accessible component libraries, accelerating client product launch cycles by 30%. - Optimized frontend performance via code-splitting, lazy-loading, and bundle analysis, boosting average Google Lighthouse performance scores from 64 to 96+, and configured automated CI/CD deployment pipelines on Vercel and AWS S3/CloudFront.	
Application Development Associate • Accenture <i>Enterprise Financial Services Technology Practice</i>	09/2021 – 12/2022 <i>Pune, Maharashtra</i>
- Engineered enterprise user interfaces utilizing Lightning Web Components (LWC), Aura Components, JavaScript (ES6+), HTML5, and SLDS for financial services clients migrating complex legacy systems to Salesforce cloud. - Developed customizable UI layouts, multi-step screen flows, route navigation menus, and dynamic form validations on the nCino platform, directly improving daily operational efficiency for 500+ commercial loan officers. - Integrated frontend components with backend Apex controllers and REST services, managing asynchronous data binding, error boundary handling, and complex state synchronization. - Maintained 85%+ code test coverage using Apex test frameworks and JavaScript unit tests, actively participating in Agile sprint planning, daily standups, and peer code reviews.	

KEY PROJECTS

- AI Sign Language Recognition & Interactive Web Application

React.js, TypeScript, Python, OpenCV, Keras, TensorFlow, WebSockets, Tailwind CSS

 - Architected an interactive web application that translates sign language alphabets (A–Z) and dynamic hand gestures into real-time speech and text to enhance digital accessibility for hearing-impaired users.
 - Developed computer vision & deep learning models using OpenCV and Keras CNN architectures, achieving a verified 95.30% accuracy for alphabet recognition and 93.0% for complex hand gestures.
 - Engineered an ultra-low latency webcam streaming UI (<50ms) using WebSockets, rendering live video feeds, real-time bounding box overlays, confidence score gauges, and accessible audio readouts.
- TransitFleet – Real-Time Public Transport Geotagging & Fleet Tracking Portal

React.js, Next.js, Leaflet / Mapbox GL, Node.js, WebSockets, Raspberry Pi, IoT

 - Engineered a responsive real-time fleet tracking portal allowing commuters to locate live transit buses, visualize upcoming route segments, and view dynamic arrival time estimates (ETAs).
 - Built interactive geospatial mapping components with custom SVG markers, smooth vehicle animation paths, and geolocation clustering using React and Mapbox GL APIs.
 - Integrated IoT hardware telemetry with Raspberry Pi, GPS sensors, and cellular SIM modules, processing live telemetry payloads pushed to client dashboards at 2-second polling intervals.
- Autonomous Maze-Solving Rover & Telemetry Dashboard (e-Yantra – IIT Bombay)

Python, OpenCV, Path Planning (A* Algorithm), WebSocket Telemetry, JavaScript, HTML5 Canvas

 - Selected as Robotics Team Lead for the national e-Yantra Robotics Competition (eYRC) organized by IIT Bombay, heading a 4-engineer team through 5 technical evaluation phases.
 - Developed computer vision algorithms in OpenCV to extract maze geometry from overhead camera streams, computing optimal trajectories using graph search and A* path planning.
 - Designed an interactive web-based telemetry visualizer using HTML5 Canvas and JavaScript to monitor rover location coordinates, ultrasonic proximity sensors, and motor RPMs in real time.

CERTIFICATIONS

- AWS Certified AI Practitioner (AIF-C01) • Amazon Web Services (AWS)

Verified Active
- Salesforce Certified Administrator (SCA) • Salesforce

Verified Active

HONORS & KEY ACHIEVEMENTS

- National Finalist & Team Lead – e-Yantra Robotics (IIT Bombay): Led college robotics team to the national finals among 500+ competing engineering colleges across India.
- Academic Distinction: Graduated with 8.36 CGPA (First Class with Distinction) in Electronics & Telecommunication Engineering from Sinhgad College of Engineering (SPPU).
- Accenture Delivery Recognition: Commended for rapid onboarding and high-velocity delivery on the nCino Financial Services core platform migration initiative.

EDUCATION

- Sinhgad College of Engineering (Savitribai Phule Pune University)

Pune, Maharashtra, India
- Bachelor of Engineering (B.E.) – Electronics and Telecommunication Engineering (E&TC)

Graduated: May 2021
- Grade: First Class with Distinction • CGPA: 8.36 / 10.0

CORE COMPETENCIES & ENGINEERING PRACTICES

Architecture & Design:	Component-Driven Architecture, Micro-frontends, Modular Design Systems, Mobile-First / Responsive Web UI
Software Best Practices:	Clean Code, DRY/SOLID Principles, Semantic HTML5, Web Accessibility (WCAG 2.1 AA), Core Web Vitals
Workflow & Tooling:	Agile/Scrum, Git Feature Branching, Pull Requests & Code Reviews, CI/CD Pipelines, Jira, Postman, Figma
